Contact surfaces 02

Stack

Trolley

A correct flow of materials, whether semi-finished or finished products, or parts in the assembly phase, plays an important role in rationalizing and optimizing the production cycle. The Emmegi Logistics line offers companies a concrete solution to all storage, handling and assembly problems. Stack is a trolley for handling and storing profiles horizontally.

Adjustable central mounts 03

Trolley

01

Swivelling castors

The trolley has 4 swivelling castors with brakes which ensure great mobility and easy handling. The brakes enable it to be locked in position in the various work areas.

02

Contact surfaces

All contact surfaces are coated with soft anti-slip PVC which prevents damage to them when the profiles are put in position.

03

Adjustable central mounts

The possibility of adjusting the central mounts enables extruded parts of different lengths to be housed and readily identified.
