Transit KA

Trolley

A correct flow of materials, whether semi-finished or finished products, or parts in the assembly phase, plays an important role in rationalizing and optimizing the production cycle. The Emmegi Logistics line offers companies a concrete solution to all storage, handling and assembly problems. Transit KA is a trolley for handling and storing sashes. The base of each compartment has a roller conveyor to make heavy or bulky workpieces easier to handle.

Transit KA

Trolley

01 Swivelling castors

The trolley has 2 fixed castors and 2 swivelling castors with brakes which ensure great mobility and easy handling. The brakes enable it to be locked in position in the various work areas.

02 Contact surfaces

All contact surfaces are coated with soft anti-slip PVC which prevents damage to them when the profiles are put in position.

03 Roller conveyor

A fixed roller conveyor made up of rollers mounted on a rod may be used to move the frame, thus ensuring smooth movement and easy handling.

TECHNICAL CHARACTERISTICS

Length (depending on model) (mm)	995 – 1540 – 2220 – 1010 1840 – 2670 – 1160 - 2140
Soft anti-slip PVC contact surfaces	•
Depth of compartments (mm)	980
Designed for use with K-Rail	•
Number of compartments	5 ÷ 15
Width of compartments D (mm)	100 ÷ 160
Base with roller conveyor	•
Push handle	•
4 swivelling castors, 2 with brake (mm)	ø 150 mm
